

– SAFETY DATA SHEET

NN-395 Superplasticizer

SNF-Based High-Range Water-Reducing Concrete Admixture

Prepared in the format of GHS / the Chemicals (MSIHC) Rules

Document No.	Revision	Issue Date	Product Code
NNPL/SDS/PROD-06	1.0	1 July 2026	NN-395

01 IDENTIFICATION

Field	Detail
Product name	NN-395 Superplasticizer
Chemical base	Sulphonated naphthalene formaldehyde (SNF) condensate, sodium salt (aqueous)
Recommended use	High-range water-reducing admixture (superplasticizer) for concrete
Supplier	NilayNarayan Polychem LLP, Plot D-167 (P), Kandra Ind. Area, Govindpur, Jharkhand 826010
Contact	+91 82925 84106 · nilaynarayanpolychem@gmail.com

02 HAZARD IDENTIFICATION

NN-395 is a low-hazard aqueous admixture. It is not classified as flammable. Principal hazards relate to mild skin/eye irritation from the alkaline liquid and trace residual formaldehyde.

- **Irritant** — May cause mild skin and eye irritation on prolonged or repeated contact.
- **Sensitiser** — Contains trace residual formaldehyde; may cause sensitisation in susceptible individuals.
- **Low fire risk** — Not flammable; not classified as an oxidiser.

Precautionary summary: avoid contact with skin and eyes; wear gloves and eye protection; wash after handling. Keep out of reach of children.

03 COMPOSITION / INFORMATION ON INGREDIENTS

Ingredient	CAS No.	Remark
Sodium naphthalene sulphonate formaldehyde condensate	9084-06-4	Active plasticizing polymer
Water	7732-18-5	Carrier / solvent
Residual formaldehyde	50-00-0	Trace; sensitiser
Sodium sulphate (minor by-product)	7757-82-6	Inert salt

04 FIRST-AID MEASURES

- **Inhalation** — Move to fresh air. If irritation or any symptom persists, obtain medical advice.
- **Skin** — Wash skin with plenty of soap and water; remove contaminated clothing. If irritation persists, seek medical advice.

- **Eyes** — Rinse cautiously with water for several minutes; remove contact lenses if easy. If irritation persists, seek medical attention.
- **Ingestion** — Rinse mouth and drink water; do not induce vomiting; obtain medical attention.

05 FIRE-FIGHTING MEASURES

- **Media** — Product is non-flammable (water-based). Use media suitable for surrounding fire: water spray, foam, CO₂ or dry powder.
- **Hazards** — Thermal decomposition may release oxides of carbon, sulphur and trace formaldehyde vapour.
- **Protection** — Wear self-contained breathing apparatus for fires in enclosed spaces.

06 ACCIDENTAL RELEASE MEASURES

- **Precautions** — Wear gloves and eye protection; avoid contact. The liquid is slippery — beware of slip hazard.
- **Containment** — Contain the spill; absorb with sand or inert absorbent; collect into containers for disposal.
- **Environment** — Prevent entry into drains and watercourses; wash residue with water.

07 HANDLING & STORAGE

- **Handling** — Handle with gloves and eye protection; avoid skin/eye contact; maintain good hygiene.
- **Storage** — Store in closed containers in dry conditions between +10 °C and +40 °C; protect from frost and direct sunlight.
- **General** — Shake/agitate before use; keep away from foodstuffs and out of reach of children.

08 EXPOSURE CONTROLS / PERSONAL PROTECTION

Control	Recommendation
Formaldehyde (trace)	Observe applicable national OEL for formaldehyde (verify locally)
Respiratory protection	Not normally required with adequate ventilation
Hand protection	Rubber / nitrile gloves
Eye protection	Safety goggles
Engineering controls	General ventilation; eyewash facility at dispensing point

09 PHYSICAL & CHEMICAL PROPERTIES

Property	Value
Appearance	Dark brown liquid
Odour	Slight characteristic
Relative density	≈ 1.12 kg/l at 25 °C
pH	Alkaline (typically 7–9; product-specific)
Solubility in water	Completely miscible
Flammability	Non-flammable (aqueous)
Chloride content	Nil

10 STABILITY & REACTIVITY

- **Stability** — Stable under normal storage and handling conditions.
- **Avoid** — Frost, prolonged heat and direct sunlight; freezing may cause precipitation (reversible by thawing and mixing).
- **Incompatibles** — Strong oxidising agents and strong acids.
- **Decomposition** — Oxides of carbon and sulphur, and trace formaldehyde, on thermal decomposition.

11 TOXICOLOGICAL INFORMATION

- **Irritation** — Mild irritant to skin and eyes; prolonged contact may cause dermatitis.
- **Sensitisation** — Trace residual formaldehyde may cause sensitisation in susceptible persons.
- **Systemic** — Low acute oral toxicity; no chronic hazard expected under normal industrial use.

12 ECOLOGICAL INFORMATION

Not expected to be significantly bioaccumulative. Large releases may raise the organic load of watercourses and alter pH. Prevent entry into drains, surface water and groundwater.

13 DISPOSAL CONSIDERATIONS

Dispose of surplus product and contaminated packaging through authorised waste handlers in accordance with local regulations. Do not discharge to drains. Cured/absorbed residue may be disposed of as inert waste where permitted.

14 TRANSPORT INFORMATION

Not classified as dangerous goods for transport (non-flammable aqueous admixture). No UN number assigned under normal classification. Confirm against current transport regulations for the packaged form before shipment.

15 REGULATORY INFORMATION

Product supplied to meet the performance requirements of IS 9103 for superplasticizing concrete admixtures. Handle in accordance with applicable chemical-safety regulations. Chloride-free; suitable for reinforced and prestressed concrete subject to IS 456 limits.

16 OTHER INFORMATION

This SDS is provided for safe-handling guidance. Exposure limits and transport classification must be verified against the regulations in force at the place of use. Issued by the NilayNarayan Polychem LLP NABL-accredited laboratory.

Disclaimer: This information is given in good faith and believed reliable at the issue date. NilayNarayan Polychem LLP makes no warranty, express or implied. Users must verify suitability and safe handling for their own conditions and comply with all applicable laws and standards.
