

— SAFETY DATA SHEET

NN-Emul SMO

Safety Data Sheet — per GHS / India CMSR 2020

SDS No.	Revision	Issue Date	Format
NNPL/SDS/PROD-02	1.0	27-06-2026	GHS Rev.9 / 16-section

1 IDENTIFICATION

Field	Detail
Product name	NN-Emul SMO (Sorbitan mono-oleate)
Chemical name	Sorbitan mono-oleate (SMO)
CAS / EC / E-No.	1338-43-8 / 618-490-5 / E494
Product type	Non-ionic surfactant / W-O emulsifier (industrial grade)
Recommended use	Industrial emulsifier, dispersant and wetting agent
Supplier	NilayNarayan Polychem LLP
Address	Plot No. D-167 (P), 4-5, Kandra Industrial Area, Govindpur, Jharkhand – 826010, India
Emergency / contact	+91 82925 84106 • nilaynarayanpolychem@gmail.com

2 HAZARD IDENTIFICATION

GHS classification: Not classified as hazardous under GHS criteria for normal industrial use.

Signal word: None

Precautionary statements: May cause transient mild eye or skin irritation on prolonged contact. Wash hands after handling. Avoid release of large quantities to the environment.

3 COMPOSITION / INFORMATION ON INGREDIENTS

Component	CAS No.	Conc. %
Sorbitan mono-oleate	1338-43-8	> 95
Minor sorbitan di-/tri-esters & related	—	Balance

A mixture of partial esters of sorbitol and its anhydrides with oleic acid. No hazardous components requiring disclosure are present above regulatory thresholds.

4 FIRST-AID MEASURES

Route	Measure
Inhalation	Not an expected route. Move to fresh air if mists/vapours from heated material are inhaled and discomfort occurs.
Skin contact	Wipe off and wash with soap and water. Remove soiled clothing. Seek advice if irritation persists.

Route	Measure
Eye contact	Rinse cautiously with water for several minutes; remove contact lenses if present. Seek advice if irritation persists.
Ingestion	Rinse mouth. Do NOT induce vomiting. Seek medical advice if a large amount is swallowed.

5 FIRE-FIGHTING MEASURES

Field	Detail
Suitable media	Foam, dry chemical, CO ₂ , water fog. Do not use a direct water jet on hot liquid.
Specific hazards	Combustible liquid (high flash point). Thermal decomposition may release CO, CO ₂ and irritating organic vapours.
Protective equipment	Self-contained breathing apparatus and full protective gear for fire-fighters.

6 ACCIDENTAL RELEASE MEASURES

Personal precautions: Wear gloves and eye protection. Spilled material is very slippery — prevent slips and falls.

Environmental precautions: Prevent large spills from entering drains and watercourses.

Clean-up: Contain and absorb with inert material (sand, earth, vermiculite); collect into labelled containers for disposal. Clean residue with detergent and water.

7 HANDLING & STORAGE

Field	Detail
Safe handling	Use with adequate ventilation. Avoid eye contact and prolonged skin contact. Wash hands after use.
Storage	Cool, dry, well-ventilated; away from heat, ignition sources and oxidisers. Keep containers closed.
Incompatibilities	Strong oxidising agents.

8 EXPOSURE CONTROLS / PERSONAL PROTECTION

Control	Detail
Engineering	General ventilation is normally adequate; local exhaust if heated and misting.
Respiratory	Not normally required.
Hands / skin	Nitrile or rubber gloves; overalls.
Eyes	Safety goggles where splashing is possible.
Exposure limits	No specific occupational exposure limit assigned.

9 PHYSICAL & CHEMICAL PROPERTIES

Property	Value
Appearance / odour	Amber to brown viscous oily liquid; mild odour
pH	Not applicable (water-insoluble)

Property	Value
Density @ 25°C	0.99 – 1.05 g/cm ³
Solubility in water	Insoluble (dispersible); soluble in oils & organic solvents
Flash point	> 110°C (closed cup)
Pour point	~10 – 12°C
Boiling point	Decomposes before boiling
HLB	≈ 4.3

10 STABILITY & REACTIVITY

Field	Detail
Stability	Stable under normal storage and handling conditions.
Conditions to avoid	Excessive heat, open flame, prolonged air exposure.
Incompatible materials	Strong oxidising agents.
Hazardous decomposition	CO, CO ₂ and irritating organic vapours on combustion.

11 TOXICOLOGICAL INFORMATION

Low acute toxicity. Sorbitan mono-oleate is widely used and has a well-established low-toxicity profile (the related group of sorbitan esters carries a JECFA ADI of 0–25 mg/kg body weight). Prolonged skin or eye contact may cause mild, transient irritation. Not classified as a carcinogen, mutagen or reproductive toxicant.

12 ECOLOGICAL INFORMATION

Readily biodegradable. Not expected to bioaccumulate. Avoid discharge of large quantities of undiluted product to surface water.

13 DISPOSAL CONSIDERATIONS

Dispose of contents and containers in accordance with the Hazardous & Other Wastes (Management & Transboundary Movement) Rules, 2016 and applicable State Pollution Control Board requirements. Do not reuse empty containers without cleaning.

14 TRANSPORT INFORMATION

Mode	Classification
Road / Rail / Sea / Air	Not regulated as dangerous goods (not classified as a DG).
UN number	None / Not applicable
Proper shipping name	Not restricted

15 REGULATORY INFORMATION

Classified and labelled per the Chemicals (Management & Safety) framework / GHS as adopted in India. Sorbitan mono-oleate (E494) is a globally recognised surfactant; the grade supplied here is for industrial / technical use.

16 OTHER INFORMATION

Prepared by: NN Polychem. Revision 1.0, 27 June 2026.

Disclaimer: The information in this SDS is given in good faith and is based on data believed to be reliable.
